

Essential infrastructure tools

- Message passing
 - ▣ Modularity
 - Encourages abstraction and decomposition of large problems into well-defined sub-problems
 - Software reuse
 - Fault tolerance
 - Creates viewports into system's internal operation
- Logging, Playback

Example

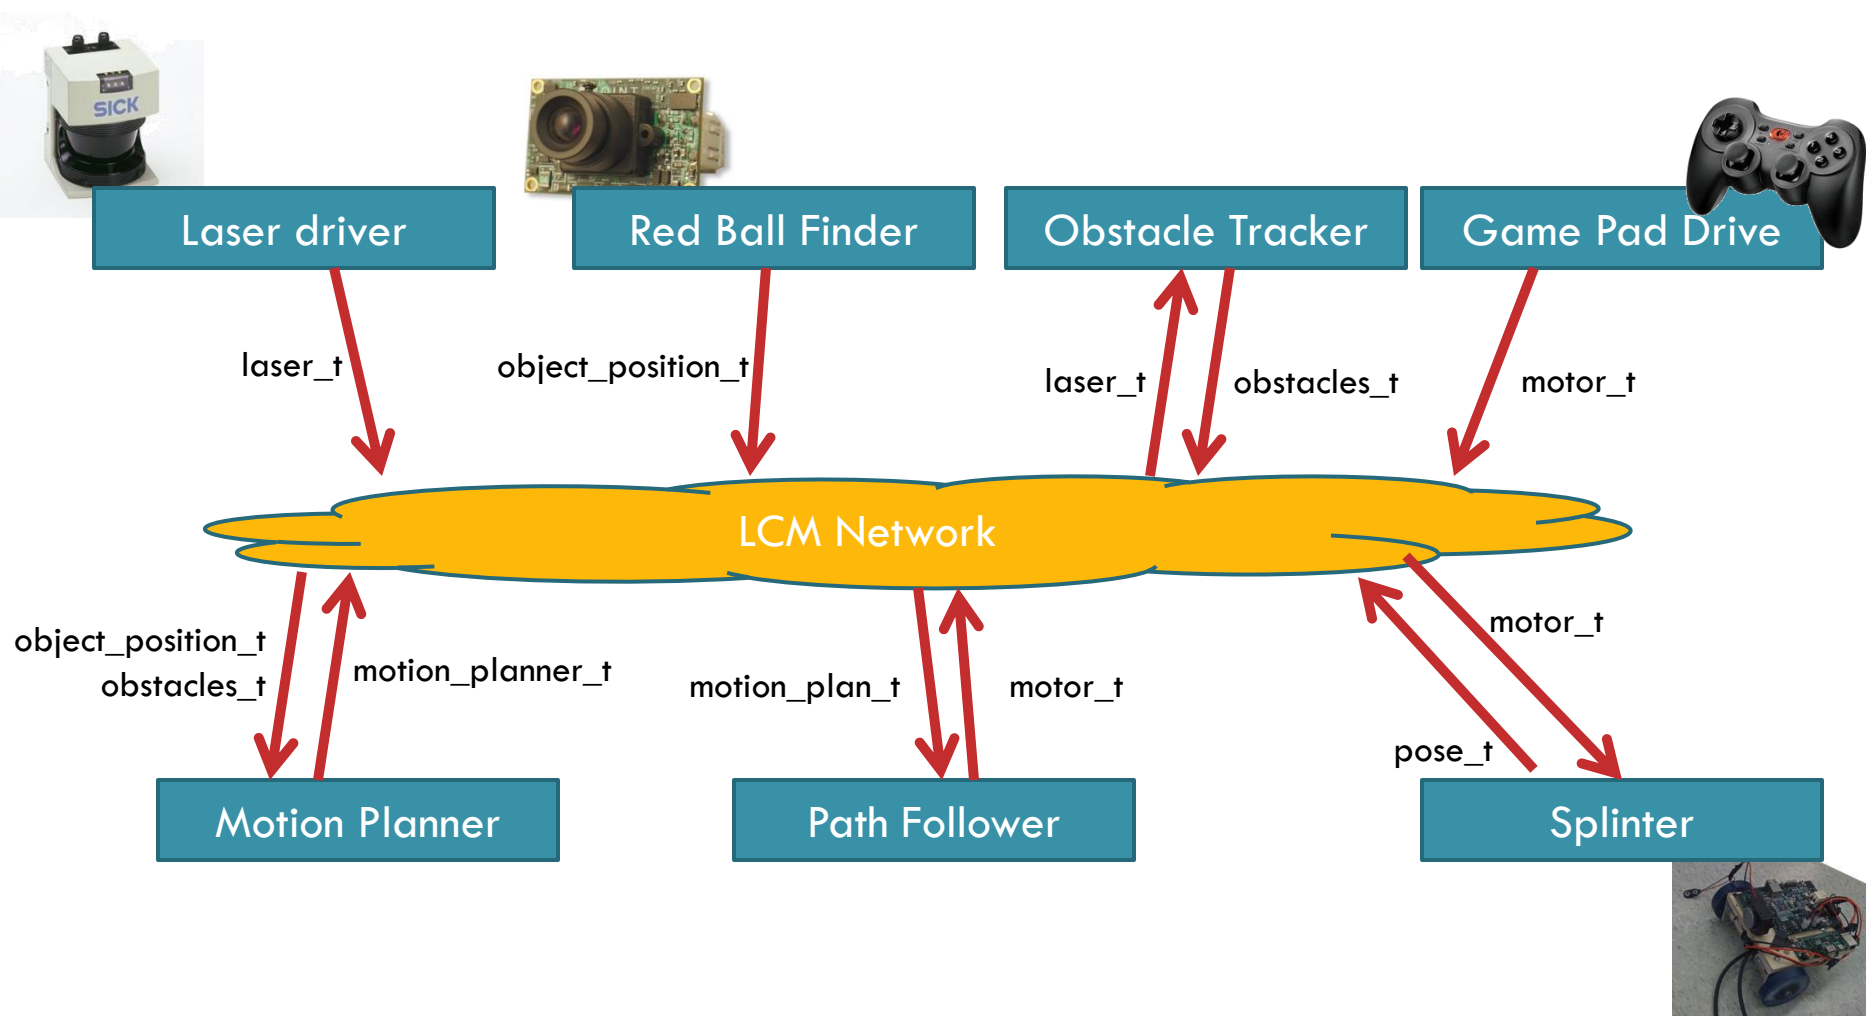

13

- MIT DUC
 - ▣ 40 CPU cores
 - ▣ 22+ distinct modules
 - ▣ 60+ module instances

PROCESS ASSIGNMENT

	core 1	core 2	core 3	core 4
20	procmgr sheriff mission manager	viewer	X	X
21	test_rtz		lane_finder fc	comsource fc
22	navigator	lane_tracker	lane_finder fcbmm	comsource fcbmm
23	skit FL skit BR skit RL skit CR	ethcon-0 ethcon-1 ethcon-2 ethcon-3 ethcon-4	lane_finder fr	comsource fr
24	skit FL skit BR skit RL skit CR	ethcon-0 ethcon-1 ethcon-2 ethcon-3 ethcon-4	lane_finder rc	comsource rc
25	skit FL skit BR skit RL skit CR	ethcon-0 ethcon-1 ethcon-2 ethcon-3 ethcon-4	lane_finder fl	comsource fl
26	curbs		lane_clines	
27	OBSTACLES			velodyne
28	position applanix	ethcon-0 ethcon-1 ethcon-2 ethcon-3 ethcon-4	adu controller	
— LOW LATENCY ONLY —				
29	logger	comsource (logging) fc	X	X
— DISK I/O ONLY —				

Modularization Example

LCM Type Definition Example

15

object_position_t.lcm

```
struct object_position_t
{
    int64_t utime;

    double distance; // distance to object
    double theta;   // direction to object
}
```

lcm-gen

```
object_position_t.[ch]
object_position_t.java
object_position_t.py
```

```
objectpos = new object_position_t();
```

```
objectpos.utime = System.currentTimeMillis()*1000;
objectpos.distance = 0.3;
objectpos.theta = -0.12;
```

LCM Type Definition Example (2)

16

laser_t.lcm

```
struct laser_t
{
    int64_t utime;

    // range data (meters)
    int32_t nranges;
    float  ranges[nranges];

    // intensity data, in sensor-specific units
    int32_t nintensities;
    float  intensities[nintensities];

    // the angle (in radians) to the first point in nranges,
    // relative to the laser scanner's own coordinate frame.
    float  rad0;

    // the number of radians between each successive sample
    float  radstep;
}
```

laser_t.[ch]
laser_t.java
laser_t.py
